sqlbolt.com/lesson/select_queries_review

Try and write some queries to find the information requested in the tasks below. You may have to use a different combination of clauses in your query for each task. Once you're done, continue onto the next lesson to learn about queries that span multiple tables.

Table: North_american_cities

City	Population
Toronto	2795060
Montreal	1717767

```
SELECT city, population FROM north_american_cities
WHERE country = "Canada";
```

RESET

Review 1 — Tasks

1. List all the Canadian cities and their populations ✓

2. Order all the cities in the United States by their latitude from north to south

3. List all the cities west of Chicago, ordered from west to east

4. List the two largest cities in Mexico (by population)

5. List the third and fourth largest cities (by population) in the United States and their population

Stuck? Read this task's [Solution](#).

Solve all tasks to continue to the next lesson.
